

Microtek ScanMaker 9800xl Plus X-Ray Scanners M1859

The Microtek ScanMaker 9800XL+ A3 flatbed scanner is popular with both the graphic arts and medical imaging markets. Whilst it may not be as fast as document scanners designed for the office market, the Microtek ScanMaker 9800XL+ offers a higher resolution and advanced scanning features which will be valued by DTP and pre-press users alike. A transparency option is available for the 9800XL+, however users seeking an A3 transparency scanner may also want to consider the Microtek ScanMaker 1000XL model instead of the 9800XL. When bundled with the optional transparent media adaptor (TMA), the Microtek 9800XL+ delivers excellent results with X-ray scanning, including OPGs.

Main features: A3+ size. USB2. For Windows & Mac, 1 year warranty RTB.
