

Fujitsu fi-7140 A4 Document Scanners FJ3099

The Fujitsu fi-7140 is a desktop A4 document scanner, featuring an 80 page ADF. The Fujitsu fi-7140 scans colour A4 documents at a speed of 40 ppm / 80 ipm in duplex mode. The scanner is capable of setting up to 80 pages, in the large volume hopper which allows quick digitising of large volumes of documents.

For scanning in the office or for counter service, the fi-7140 will not keep you, or your customers waiting. The scanner supports USB2.0 for high speed data transfer to your computer.

The Fujitsu fi-7140 has the ability to scan **mixed documents**, small cards or extra long documents. Paper Protection constantly checks along the whole document length during scanning and automatically stops paper feeding when error occurs to avoid any damage to the document to deliver a reliable scanning experience to the user. It is equipped with Skew Reducer to detect the alignment of scanned documents and correct paper skews to minimise missing the edge of scanned documents. Users can rest assured that the result will be good even when scanning documents that are not aligned correctly.

The PaperStream IP scanner driver, which supports TWAIN/ISIS, saves the inconvenience of fine adjusting the settings for the OCR process. It automatically converts the images into exceptionally clean images, accelerating OCR even when scanning wrinkled, soiled documents and even documents with a background pattern.
