## Description

The Fujitsu fi-7160 is a desktop A4 document scanner, featuring an 80 page ADF. It replaces the popular Fujitsu fi-6130Z scanner. The Fujitsu fi-7160 scans colour A4 documents at a speed of 60 ppm / 120 ipm in duplex mode. The scanner is capable of setting up to 80 pages, in the large volume hopper which allows quick digitising of large volumes of documents.

The scanner supports USB3.0 for high speed data transfer between scanner and the computer. The Fujitsu fi-7160 has the ability to scan mixed documents, small cards or extra long documents. It includes PaperStream IP which features advanced image processing at Twain/ISIS driver level, and the PaperStream Capture application.

The LCD is equipped on the operational panel to display the operational settings for scanning documents, the number of sheets scanned, and error status. It is used to easily check the status of the scanner.

The Paper Protection II function reduces the risk of having the documents damaged by stopping the scan when the scanner detects a paper jam sound. The scanner is equipped with "Skew Reducer" to ensure straight paper feeding even for mix batch of small or thin papers which prevents the occurrence of missing the edge of the scanned image data.

Main Features: 60ppm (120ipm), 80p ADF, A4, True Duplex, USB3. 1 year warranty RTB.
